SUMMARY

Software Engineer Intern candidate with hands-on experience building and shipping full-stack web applications and Chrome extensions used by real users. Strong in TypeScript, JavaScript, React, Next.js, Node.js, Express, PostgreSQL, MongoDB, REST APIs, and LLM API integration. Strong problem-solving foundation through competitive programming with 1600+ LeetCode problems solved. Seeking to contribute across frontend, backend, and product engineering.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java

Frontend: React.js, Next.js, Chrome Extensions API

Backend: Node.js, Express.js, REST APIs

Databases: PostgreSQL, MongoDB, MySQL, Supabase

AI Integration: OpenAI API, Gemini API, Prompt Engineering

Tools & Platforms: Git, GitHub, Vercel, Netlify, Google Workspace APIs

Other: Data Structures and Algorithms, Web Scraping, Automation, Data Cleaning, ETL Scripting

PROJECTS

Scaler++ | *TypeScript, JavaScript, Chrome Extensions API*

- Built and shipped a Chrome extension to improve usability of Scaler's learning dashboard for students and reduce friction in daily learning workflows.
- Reached 1000+ active installs on the Chrome Web Store through organic adoption and word-of-mouth among peers.
- Owned the product end-to-end as a solo developer, from identifying pain points and defining features to release and maintenance.

FIARY – AI Smart Diary | *React.js, Node.js, Express, MongoDB, LLM APIs*

- Built a full-stack journaling and productivity application to replace unstructured paper journaling with searchable digital workflows.
- Designed backend APIs and data models for 8+ modules, including diary entries, habits, expenses, memories, todos, thought dump, and custom shelves.
- Integrated LLM APIs to generate summaries, mood insights, and personalized feedback from journal entries.
- Structured schema relationships to support efficient cross-module data retrieval across the application.

TermLens – AI Research Assistant | *JavaScript, Chrome Extensions API, LLM APIs*

- Built a Chrome extension that explains highlighted text and enables page-aware AI chat while browsing.
- Injected page context into prompts so the model responds using on-screen content instead of isolated user queries.
- Published the extension for real users to support faster research and learning workflows inside the browser.

PaperPlayground – PDF to Visual Novel | *React.js, FastAPI, LLM APIs*

- Built a web application that converts uploaded PDFs and text files into interactive visual-novel-style experiences.
- Developed an LLM pipeline that extracts document concepts and transforms them into story structure, dialogue, characters, and choices.

ACHIEVEMENTS

- Open Source:** Completed [Hacktoberfest 2024](#) and [Hacktoberfest 2025](#); contributed to open-source repositories.
- Chrome Extensions:** Published 2 Chrome extensions; Scaler++ reached 1000+ active installs on the Chrome Web Store.
- Competitive Programming:** [Codeforces Pupil](#) | [CodeChef 3-star](#) | [LeetCode 1600+](#)

EDUCATION

Scaler School of Technology – BITS Pilani | Bengaluru, India

B.Sc. in Computer Science | *Expected 2027*

- CGPA: 8.97/10
